The Hull Institute of Learning and Simulation (HILS) team have launched a newsletter to keep our followers updated with the latest news and developments.

HILS provide clinical skills training and simulation based education to all health care professionals within the organisation and is accessible to NHS professionals across the Yorkshire and Humber region. Simulation has become the forefront of medical education and is becoming increasingly popular as a training method.

The centre houses the following rooms:
- 3 x Seminar rooms (which can be partitioned or opened up as one large room)
- 3 x Practical Flexible Training Suites with wet lab facilities
- Operating Theatre
- Four Bedded Ward Area
- Communication Skills Room
- Procedural Simulation Room equipped with:
  - Laparoscopic Simulator, Abdominal Ultrasound Simulator, Vaginal Ultrasound Simulator, Upper GI/Bronchoscopy Simulator, Angiomentor Simulator

HILS have a dedicated website, visit www.heyhils.co.uk to view the full range of courses we have on offer here as well as information on how to book.

HILS are also Institutional members of ASPIH, Association for Simulated Practice in Healthcare, ASPIH are the UKs national governing body for Simulation.

HILS are part of the SPARK regional networking group Simulation Partnership for Advancing Regional Knowledge, who work together to promote simulation based education across the region.

The team are multi skilled and able to offer a variety of in house services including;
- Moulage
- Simulated Patients (actors)
- Wet Lab (Animal Tissue) Models
- Technical Services
- Media Production (videos and a poster design and printing service)
- Courses Team

Best Wishes,
The HILS Team
Did you know that the Hull Institute of Learning and Simulation (HILS) offer an In Situ simulation service?

This means that our team will work with you and your department to run scenario based training in your own clinical environment. You might find it more flexible to release staff for shorter periods to train in their usual area, rather than attend traditional teaching events. Training as a team in the clinical setting can have benefits beyond individual and team learning. It can be used to test systems, processes and pathways and identify potential errors and near misses.

HILS have the expertise and resources to supply and run a variety of simulators (adult, paediatric, maternity and procedural skills), as well as provide simulated patients (actors) and moulage services, to ensure the realism of the scenarios. We have experienced faculty who may be able to assist with scenario development and support debriefing for learners in your area. If you are interested in running an in situ within your area or getting involved in an existing programme please contact; donna.major@hey.nhs.uk or olivia.charlton@hey.nhs.uk

To apply to become an Associate Simulation Fellow please send your CV to Donna Major, Clinical Skills Manager Donna.Major@hey.nhs.uk Deadline for applications is 23:59 hrs on Tuesday 21st August 2018. Appointment is by interview on Tuesday 11th September 2018.

Would you like a tour?

If you would like to book a tour of the facilities or find out further information, please contact HILS Manager; donna.major@hey.nhs.uk or telephone: 01482 816716

Where is HILS?

You can find HILS at the top of Fountain Street off Anlaby road, 2nd floor above the Eye Clinic.

Please see the map below for nearby parking facilities.
**European Trauma Course**
The course is aimed at doctors and healthcare professionals managing major trauma as part of a Trauma Team.
25.09.2018—27.09.2018
£750

**Managing Emergencies in Paediatric Anaesthesia**
The course is suitable for all healthcare professionals working with Paediatric Anaesthesia
22.10.2018
£95

**Hull Interdisciplinary Tracheostomy Course**
The course is suitable for anyone who looks after patients with tracheostomies or laryngectomy stomas
02.10.2018
£75

**The Obstetric Anaesthesia Advanced Simulation Training of Yorkshire**
The course is suitable for consultant anaesthetists, SAS doctors and senior trainees with an interest in obstetric anaesthesia
19.11.2018
£200

**Train the Trainers in Simulation**
The course is suitable for all healthcare professionals interested in an introduction to simulation
18.09.2018
£95

**Basic Obstetric Anaesthesia Simulation Training Course**
The course is suitable for all CT2 trainees in Anaesthesia
10.10.2018
£125

**ABC of Debriefing and Feedback**
The course is suitable for all healthcare professionals providing feedback in clinical, managerial and educational settings
30.10.2018
£200

Email clinical.courses@hey.nhs.uk for further information and visit www.heyhils.co.uk for the full range of courses.
